DESCRIPTIVE PRICE LIST

JEFFERSONS

Reliable

PLANTS

★ **1935** ★

OUR plants are grown in the open field and hardened through frost and freezing weather, and will mature four weeks earlier than home grown or hot bed plants. After going through this frost and freezing weather they have been known to survive 10 above zero without injury to the plants!

You Can Produce a Crop of Cabbage Four Weeks Earlier by Using Our Field Grown Frost Proof Cabbage Plants

THE JEFFERSON FARMS

ALBANY, GEORGIA

Charleston Wakefield

Charleston Wakefield

This cabbage is a Selection from the Early Jersey. It was originated by one of our oldest growers, and is the best all-around cabbage in existence; it is only about ten days later than the Early Jersey, and we recommend it above all others.

Early Jersey Wakefield

Early Jersey Wakefield

Many market gardeners consider this the best cabbage in cultivation. Its merits are many, among which are large heads for an early variety, small outside foliage, and uniformity of crop. The heads are medium size, cone shaped, and are white, solid and tender.

Large Flat Dutch

Early Flat Dutch

This variety needs no recommendation, as it is one of the oldest in cultivation. Exceedingly valuable for its quality, and for its ability to resist heat. Heads very solid, round, flattened on top, tender and fine grained.

Henderson Succession

Henderson Succession

The Earliest of the flat head varieties. A sure header, and a very hardy grower, both in cold and hot weather. This variety is grown extensively in the South and gives universal satisfaction. We strongly recommend this variety.

Copenhagen Market

The heads of this variety are exceptionally large for an early variety. Growth is vigorous with solid compact heads with few outer leaves. About as early as Early Jersey Wakefield.

FROST PROOF ONION PLANTS

White Bermuda

White Bermuda Onions are noted for their earliness, heavy yield and mildness of flavor. We plant our seed in October, and the plants take on root growth during the winter months, and will grow very fast when put out in the Spring and we strongly recommend them for the more Northern Sections of the South where it gets too

cold for this variety to live during the winter.

Crystal White Wax

This Onion is so well known it needs very little description in this price list. It is the most attractive onion grown, snow white in appearance, which makes it sell well on any market. Every garden should have a few rows of this variety.

PORTO RICO YAM SWEET POTATO PLANTS

This variety is by far the best and most profitable sweet potato grown. A very heavy yielder, requiring less cultivation due to rapid growth and rapid foliage which shades the ground. We grow no other variety so you can rest assured that you get a pure strain from our farm.

Orders must be placed far in advance as we only need sufficient seed to insure the number of plants for which we have orders. Shipment after April 1st. Prices Postpaid: 500 for \$1.25, 1000 for \$2.25. By Express or Parcel Post Collect: 1000 for \$1.75, 5000 for \$7.50.

FIELD GROWN TOMATO PLANTS

Our open field grown Tomato plants are strong and hardy, short jointed and well rooted. Not to be compared with soft tender plants from greenhouses. Will produce a crop of Tomatoes much earlier than home grown plants. Our plants are grown from Certified Seed, and the plants Government Inspected. All plants packed with tops ventilated with damp moss to roots. Shipment any time after April 1st.

Earliana Our Earliana is the earliest tomato grown, and very popular for home gardens and early market. The fruit is medium size, smooth, globe shaped, bright scarlet, and very prolific.

Bonny Best Standard second early variety, valuable for market gardeners, shippers and canners. Fruits medium size apple shaped, smooth, solid, bright scarlet in color, of excellent quality.

MarGlobe Recently introduced by United States Department of Agriculture. This main crop variety has come into wide use for truckers and shippers. Plants vigorous, with heavy foliage, resistant to wilt and nail-head rust. Fruits medium large, globe shape, smooth, solid, with thick walls and cross section, of fine quality.

Greater Baltimore Our improved strain is particularly desirable, as it is earlier and deeper than most stocks. Vine large and medium heavy. Fruits large, smooth, deep red, solid and attractive. Used extensively for canning and by market gardeners.

New Stone A medium late variety, deservedly popular with canners and market gardeners. Our strain ripens evenly, and is uniform. Vines large, dense, very productive. Fruit large, flatten but deep, smooth, attractive scarlet red, of fine flavor.

An **ADDITIONAL PROFIT** *of* **\$150.00** **AN ACRE**

An Acre of Cabbage

well taken care of in an ordinary season will produce 15,000 heads, or thirty thousand pounds of good, wholesome food for man or beast. If you can realize the small sum of one cent per head you would realize

\$150.00 an Acre

and at one cent per pound would sell for \$300. At the time this is written cabbage is selling for three and one-half cents per pound here wholesale. Ask your local grocer the market quotations on cabbage. You can follow this same acre of land with cotton, corn or potatoes and make a good crop without additional fertilizer.

Our Guarantee

All plants are guaranteed to reach you in good condition. Should there be any damaged plants, select the good ones and notify us at once.
